

## GED 21<sup>st</sup> Century CD-ROM

---

Following are recommended platform requirements for *GED 21<sup>st</sup> Century* LAN/WAN and Standalone versions.

### **Servers**

As with any client/server application, *GED 21<sup>st</sup> Century* runs more efficiently on systems that have substantially more RAM and processor speed.

#### **Microsoft**

Windows 2003  
Windows 2000  
512 MB Available RAM  
Pentium 4, 1.5 Ghz  
100 MB free disk space  
Network Speed 10+ Mbps  
TCP/IP connection

#### **Novell**

NetWare v.6.5 with JVM 1.42\*  
NetWare v.6.0 with JVM 1.31 or 1.42  
2 GB Available RAM\*\*  
Pentium 4, 1.5 Ghz  
100 MB free disk space  
Network Speed 10+ Mbps  
TCP/IP connection

Notes:

\* Netware v.6.5 with SP8 and JVM 1.43 or above is not supported.

\*\* NetWare handles Java™ technology runtime libraries differently than Windows-based operating systems, so it requires additional RAM be available.

### **Clients**

#### **Microsoft® Windows® Client Workstations and Standalone Systems**

- Windows Vista, XP, 2000
- 128 MB RAM or more
- Pentium 3, 500 Mhz
- Network client disk space: 40 MB free disk space for student application only; 40 MB for management system only; or 45 MB for both applications
- Standalone disk space: 70 MB
- SVGA Monitor, 800x600 (16-Bit High Color or greater)
- CD-ROM drive for installation
- TCP/IP connection for LAN
- DeskJet/LaserJet Quality Printer (optional)

#### **Macintosh Client Workstations\***

- Apple® Macintosh OS X v10.2.6+ JVM 1.4.1, or 10.2.8+ with JVM 1.4.2
- 128 MB RAM or more
- 40 MB available disk space if networked client has student application only; 40 MB for management system only; 45 MB for both applications on the client workstation
- SVGA Monitor, 832x624 (75 MHz resolution thousands of colors)
- CD-ROM drive for client installation
- TCP/IP connection
- DeskJet/LaserJet Quality Printer available (optional)

\* *GED 21<sup>st</sup> Century* is not available for use on standalone Macintosh computers or site licenses.

## GED 21<sup>st</sup> Century Online

---

Following are recommended platform requirements for *GED 21<sup>st</sup> Century* online.

### **Bandwidth**

Institutions: Fractional T1 Line, Frame Relay, Full T1 Line or T3 Line, or ATM.

Home Users: DSL (Digital Subscriber Line), cable modem, or satellite dish. Dialup is supported.

### **Clients**

#### **Microsoft® Windows® Client Workstations and Standalone Systems**

Windows 2000, XP, or NT® 4.0 with JVM 1.4.2

128 MB RAM or more

SVGA Monitor, 800x600 (16-Bit High Color or greater)

TCP/IP connection

DeskJet/LaserJet Quality Printer available (optional)

*Windows Browser Requirements:*

Internet Explorer® (IE) 6 and higher

Netscape® Navigator® 7.1 and higher

#### **Macintosh Client Workstations\***

Apple® Macintosh® OS X v10.1.x up to 10.2.5 with JVM 1.3.1, or OS X v10.2.6+ JVM 1.4.1, or 10.2.8+ with JVM 1.4.2

128 MB RAM or more

SVGA Monitor, 832x624 (75 MHz resolution thousands of colors)

TCP/IP connection

DeskJet/LaserJet Quality Printer available (optional)

*Macintosh Browser Requirements:*

Internet Explorer 5.2

Netscape Navigator 7.1 and higher

\**GED 21<sup>st</sup> Century* is not available for use on standalone Macintosh computers or site licenses.

#### **Notes on GED 21<sup>st</sup> Century Online:**

- Each operating system requires the latest service packs.
- Due to access-restriction issues, launching through a Samba-mounted volume is not recommended.
