

## **Read On! System Specifications for Windows®**

---

### **Server for Microsoft® Windows®**

- Windows Server 2003, or 2000
- Pentium 4 class processor or compatible
- 1 GB of available RAM
- 6 GB of available space on hard disk
- Network speed 10 Mbps. (100 Mbps. is recommended)
- TCP/IP connection

**NOTE:** If you have 100 students or more working in the program at the same time, your server will require the following:

- Pentium 4 class processor or compatible operating at 2.4 GHz or higher
- 2 GB RAM minimum

### **Microsoft Windows Client Workstations**

- Windows Vista, XP, or 2000
- Pentium 3 / 933 or greater
- 256 MB RAM or more
- SVGA Monitor, 16-Bit High Color or Greater, with resolution set to 800x600
- Headphones
- CD-ROM drive for installation
- TCP/IP connection
- Flash 9 (Will be installed by Read On! if needed.)
- Java Runtime Environment 1.5.0\_04 (Will be installed by Read On! if needed.)
- Javascript enabled (Will be enabled by Read On! if needed.)
- DeskJet/LaserJet Quality Printer available for printing reports

### **Windows Browser Requirements**

Even though they will not be connected through the Internet, client workstations will need a browser to run the program.

- Internet Explorer® (IE) 6 and higher

### **Notes:**

- As with any client/server application, Read On! will run more smoothly on a system that has substantially more RAM and processor speed.
- A WAN Installation requires a sufficient cable plant and high-speed network infrastructure for adequate performance between site locations. A dedicated full T-1 line or better between locations is recommended.
